

# ARUN

Software Engineer | AI/ML Developer | Python | MERN Stack | Android Developer  
arun95arun9120@gmail.com | +91-9598228821 | LinkedIn | GitHub | Jhansi, UP, India

## Summary

Final-year CSE student with hands-on experience in software engineering, ML model development, REST APIs and scalable full-stack applications. Skilled in MERN stack, transformer-based AI, Android apps and CNN-based computer vision systems. Strong foundations in problem solving, system design, debugging and writing clean, maintainable and testable code.

## Technical Skills

**Programming:** Python, JavaScript (ES6+), TypeScript, Java, C/C++  
**AI/ML:** NumPy, Pandas, TensorFlow, Scikit-learn, OpenCV, Matplotlib, HuggingFace Transformers  
**Web Development:** React.js, Node.js, Express, Nest.js, Flask, REST APIs, JWT Auth, CI/CD  
**Databases:** MongoDB, MySQL  
**Android:** Kotlin, Android Studio, REST API Integration  
**Tools & Cloud:** Docker, GitHub Actions, Postman, Firebase, AWS (EC2/S3)  
**Soft Skills:** Problem Solving, Communication, Ownership, Debugging, Team Collaboration

## Education

|                                                                                  |                            |
|----------------------------------------------------------------------------------|----------------------------|
| <b>B.Tech in Computer Science &amp; Engineering</b>                              | 2023 – 2026                |
| Rajkiya Engineering College, Kannauj (AKTU)                                      | CGPA: 7.43 (till last sem) |
| <b>Polytechnic Diploma in Engineering</b>                                        | 2020 – 2023                |
| SR Group of Institutions, Jhansi (BTEUP)                                         | 75.54%                     |
| <b>12<sup>th</sup></b> (CBSE), Rajkiya Ashram Paddhati Inter College, Jhansi     | 72.4%                      |
| <b>10<sup>th</sup></b> (UP Board), Rajkiya Ashram Paddhati Inter College, Jhansi | 75.83%                     |

## Experience / Certifications

|                                                            |          |
|------------------------------------------------------------|----------|
| <b>Full Stack Intern — Vault of Codes</b><br><i>Remote</i> | Aug 2025 |
|------------------------------------------------------------|----------|

- Developed and deployed a MERN-based blogging platform with JWT auth and CRUD modules.
- Designed scalable REST APIs and optimized MongoDB indexing improving backend response time.
- Improved UI/UX with reusable components and responsive layout structure.

|                                                         |              |
|---------------------------------------------------------|--------------|
| <b>Android Developer Intern — Skillbit Technologies</b> | Aug–Sep 2025 |
|---------------------------------------------------------|--------------|

- Developed core UI screens in Kotlin using MVVM architecture and Jetpack components.
- Integrated REST API with Retrofit enabling real-time data sync and better app interaction.
- Improved code maintainability by reducing redundancy and applying modular design.

|                                            |              |
|--------------------------------------------|--------------|
| <b>Cyber Security Intern — C-DAC Noida</b> | Jul–Aug 2025 |
|--------------------------------------------|--------------|

- Performed vulnerability scanning and penetration testing under OWASP guidelines.
- Assisted in improving authentication flow by identifying weak access patterns.

## Projects

|                                                                                 |      |
|---------------------------------------------------------------------------------|------|
| <b>LiteAI — Local AI Assistant</b><br>GitHub • Flask, Transformers, HTML/CSS/JS | 2025 |
|---------------------------------------------------------------------------------|------|

- Built an offline AI assistant for Q&A, summarization, and text generation using transformer models.
- Integrated HuggingFace pipelines optimized for CPU inference and resource efficiency.
- Designed minimal UI for seamless interaction and usability.

|                                                      |      |
|------------------------------------------------------|------|
| <b>SocialBlog — MERN Blogging Platform</b><br>GitHub | 2025 |
|------------------------------------------------------|------|

- Developed MERN platform with authentication, CRUD, RBAC and media handling.
- Improved backend performance via optimized database queries and secure implementation.

|                                            |      |
|--------------------------------------------|------|
| <b>AI Image Classifier (CNN)</b><br>GitHub | 2025 |
|--------------------------------------------|------|

- Built and trained a CNN model for multi-class image detection using TensorFlow.
- Applied augmentation and hyperparameter tuning improving accuracy and model generalization.
